

CHROMOGENS

3,5-DiBr-PAESA – PAE-05C

SPECIFICATIONS

CAS	100743-65-5
Name	4-(3,5-dibromo-2-pyridylazo)-N-ethyl-N-sulfopropylaniline mono-sodium salt, monohydrate
Appearance:	Dark reddish brown or black purple brown powder
Molecular weight:	546.21
Molecular formula:	C ₁₆ H ₁₇ Br ₂ N ₄ NaO ₃ S.H ₂ O
Solubility in water:	To pass test (clear, red)
Molar absorptivity:	> 32 000 (around 503 nm)
Molar absorptivity (Cu chelate):	> 124 000 (637 nm)
IR spectrum:	Authentic
Storage:	Store in a cool and dry place. Keep tightly closed. Protect from metal.
Stability:	At least 1 year at 2 – 8 °C.

3,5-DiBr-PAESA

CONTACTS

APPLICATIONS

This compound is used for the detection of Cu(II) and Ag(I) in clinical chemistry reagents. λ max and absorptivity, respectively 639nm/134,000 and 618nm/80,000
